computer communications

Index to Volume 20 (1997/98)

No 1 (January) pp 1–70
No 2 (February) pp 73–142
No 3 (March) pp 143–210
No 4 (April) pp 211–312
No 5 (May) pp 313–410
No 6 (June) pp 411–519
No 7 pp 521–604
No 8 (July) pp 605–714
No 9 (August) pp 715–824
No 10 pp 825–925
No 11 (September) pp 927–1030
No 12 (October) pp 1031–1132
No 13 (November) pp 1133–1238
No 14 (Dec) pp 1129–1302
No 15 pp 1313–1390
No 16 pp 1391–1557

Article index

Number 1

Performance evaluation of PC routers using a single-server multi-queue system with a reflection technique
A. Jirachiefpattana, P. County, T.S. Dillon, R. Lai 1
Circuit emulation approach to traffic control in a B-ISDN
A. Baiocchi, N. Bléfari-Melazzi, F. Cuomo, M. Listani 11
Space division approach to implement a shared buffer in an ATM switch
D.C.W. Pao, S.C. Leung 29
Message delay for a priority-based automatic meter reading network
I. Frigui, R. Stone, A.S. Alfa 38
LAN Emulation over ATM
M. Taylor 48
Delay constrained distributed multicast routing algorithm
Y. Im, Y. Lee, S. Wi, Y. Choi 60

Number 2

SNMP, SNMPv2 and CMIP — the technologies for multivendor network management
R. Hunt 73
High performance copy network design for multicast ATM switching
X. Liu, H.T. Mouftah 89
Designing bug-free protocols with SPIN
G.J. Holzmann 97
Comparative analysis of MPEG and ATM multiplexing functions for multimedia interactive services
A. Profumo, I.S. Venieris 106
Analysis and design of Banyan and crossbar switches with bypass queues
J.-H. Huang, Y.-S. Su 115
Performance analysis of the bilayered ShuffleNet and SR_Net under deflection routing
F. Ayadi, J.F. Hayes, M. Kavehrad 125

Number 3

A personal communication support system based on X.500 and X.700 standards
T. Eckardt, T. Magedanz, R. Popescu-Zeletin 145
Distributed video conferencing systems
M.H. Willebeek-LeMair, Z.-Y. Shae 157
Robustness of real-time local area network protocols
K.H. Kim, C. Serro 169
Processing of confidential information in distributed systems by fragmentation
J.-C. Fabre, T. Pérennou 177
Customization of system software for large-scale embedded applications
J. Nehmer, P. Sturm, M. Baentsch, L. Baum, G. Molter, S. Rothkugel 189
An architecture for high availability multi-user systems
K.-W. Rim, B.-J. Min, S.-S. Shin 197

Number 4

A timestamp model for determining real-time communications in intelligent networks
A. Patel, S. O'Connell 211
Design and performance evaluation of intelligent multimedia services
L. Orozco-Barbosa, D. Makrakis, C.H. Yang, N.D. Georganas 219
TINA — Architectural basis for future telecommunications services
T. Magedanz 233
On the modification experienced by a bursty traffic stream passing through a B-ISDN and on the congestion control problem
N. Bléfari-Melazzi 246
A congestion-avoidance scheme for LAN interconnection over high-speed networks
H.S. Hassanein 261
Steady-state analysis of rate-controlled data transport in ATM Local Area Networks
H.-B. Chiou, Z. Tsai 273
On the performance study of multi-plane ATM switches
J.-L.C. Wu, L.-D. Chou, H.-F. Su 288
A new approach to the information set decoding algorithm
D.J. de Barros, W. Godoy Jr, E.C.G. Wille 302

Number 5

An efficient hybrid MAC protocol for high-speed LANs
J.M. Senior, G.N. Higginbottom 313
A technique for multi-network access to multimedia messages
A. Patel, K. Gaffney 324
Distributed gang scheduling in networks of heterogeneous workstations
K. Al-Saqabi, S. Sarwar, K. Saleh 338
Design of a proxy for managing CMIP agents via SNMP
E. Koerner 349
A migration tool to support resource and load sharing in heterogeneous computing environments
P.D. Le, B. Srinivasan 361
Authorization with security attributes and privilege delegation
Access control beyond the ACL
Y. Sameshima, P. Kirstein 376
A tool for layered analysing and understanding of distributed programs
W. Zhou 385
Dynamic application scaling as a means for QoS management
Y.I. Manolessos, M.E. Theologou 393

Number 6

Architectural support for QoS management and abstraction: SALMON (Support Architecture for transmission of Live Media streams On networks)
A. Schill, T. Hutschenreuther 411
ATM-based local area networks — the COSY migration approach
L.D. Vu 420
TMN-based schedulers for SS7 routing verification tests
R.H. Glitho 428
Real-time communications using TDMA-based multi-access protocol
F. Simonot, Y.Q. Song 435
The spiral ring
W. Dobosiewicz, P. Gburzyński 449
OSI remote procedure call: Standardization issues, design and implementation
Y. Liu, D.B. Hoang 462

0140-3664/98/$19.00 © 1998–Elsevier Science B.V. All rights reserved

Usability of communication performance models
A video-on-demand case study
S. Böcking 475
An ordered and reliable broadcast protocol for distributed systems
Y.-I. Chang, M.-H. Hwang 487
An advanced call model to support multimedia multiuser communications
S. Park, Y. Choi 500
A minimal cost design for a large hierarchically clustered computer communication network considering a desired index of service
A. Mukherjee, B.B. Bhaumik, A.K. Bandyopadhyay 507
A fault-tolerant 2*2 switching element for switching networks
R. Mittal 512

Number 7

Fast heuristics for practical TDM network design
G.P. Ray, P.W. Sanders, C.T. Stockel 521
Design of simplified protocol converters through protocol complementation
S. Das, P. Dhar 528
Performance analysis of the p_i-persistent protocol in unidirectional bus networks
R. Mathar, K. Pawlikowski 535
Fault-tolerant design of packet switched network with unreliable links
C.G. Kang, H.H. Tan 544
Forward error correction and design of spread spectrum based multiple access networks
S. Gupta 554
Performance analysis of an HDLC-based protocol with data compression
M. Ruplitsch, A. Patel 567
On the multidensity gateway location problem for a multilevel high speed internetwork
D. Saha, A. Mukherjee 576
Virtual cell in mobile computer communications
K. Lim, Y.-H. Lim, Y.-H. Lee 586

Number 8

Network path caching: Issues, algorithms and a simulation study
M. Peyravian, A.D. Kshemkalyani 605
A multimedia gateway for phone/fax and MIME mail
S.-F. Yu, L.-M. Tseng 615
Modularity versus efficiency in OSI system implementations
G.-S. Poo, B.-P. Chai 628
Design and performance of a multiple parallel shared memory switch
G. Kbar 639
The client/server way to interconnect high-speed LANs
B. Paillassa 649
A quantitative performance comparison study of all-optical slotted rings with different packet header speeds
C.-S. Kang, B.-S. Park, J.-D. Shin, M.-Y. Jeon, E.-H. Lee 662
Delay analysis of a worst-case model of the MetaRing MAC protocol with local fairness
G. Anastasi, M. La Porta, L. Lenzini 671
GCRA-based architecture of multi-connection shaper and enforcer in multi-service ATM networks
J.-S. Wu, S.-W. Sue, F.-J. Kuo 681
Temporal network management model Concepts and implementation issues
T.K. Apostolopoulos, V.C. Daskalou 694

Number 9

Dynamic management of non-isochronous multipriority traffic in DQDB metropolitan area networks
A. Borella, P. Micucci 715
Significantly ordered delivery of messages in group communication
T. Tachikawa, M. Takizawa 724
Neural-network-based call admission control in ATM networks with heterogeneous arrivals
J.M. Hah, P.L. Tien, M.C. Yuang 732
Configuring group-multicast rings with randomly selected nodes on binary *n*-cubes
W. Lin, W.-S.E. Chen 741
A group multicast routing algorithm by using multiple minimum Steiner trees
X. Jia, L. Wang 750
ASET: A simulator toolkit for performance evaluation of ATM switches
N.N. Raju, R. Mittal 759
Protocol validation by simultaneous reachability analysis
K. Özdemir, H. Ural 772
Performance evaluation of the register insertion protocol for voice–data integration
S. McKenzie 789
An efficient link enhancement strategy for computer networks using genetic algorithm
D. Saha, U.K. Chakraborty 798
Adaptive bandwidth balancing mechanisms for DQDB networks
G. Cena, L. Durante, R. Sisto, A. Valenzano 804

Number 10

Comparison of MPEG data transferring schemes in ATM networks
J. Kim, S. Bahk 825
High-speed network security. I. SMDS and Frame Relay
V. Varadharajan, P. Katsavos 832
Performance analysis and design of an access algorithm for an ATM ring network with spatial reuse
H.-T. Wu, I. Rubin 848
Optimal allocation of clients to file servers
D. V. Ammaiyar, S.V. Raghavan 863
Simulation study of prioritized forward error correction in ATM networks
J.-S. Wu, C.-C. Peng 873
Queue length solutions for an ATM buffer with MMBP arrivals
N.C. Hock, L. Bai, Z. Liren 878
A workload model for performance evaluation of multimedia signalling systems
M.E. Lekkou, I.S. Venieris 884
BRP: A new learning bridge for OSInet
S.V. Raghavan, G. Rajeev 899
Industrial communications architectures and their application in a garment computer integrated manufacturing cell
A.I. Kokkinaki, M.J. Morse 912

Number 11

Standard specification extensions for provision of language and character enabled server
B. Jerman-Blažič, K. Chuguev, A. Gogala 927
Delay priorities enhance utilisation of ATM PON access systems
J.D. Angelopoulos, G.C. Boukis, I.S. Venieris 937
EFSM-based continuous media synchronization in multicast networks
C.-M. Huang, H.-Y. Kung, P.-C. Liu 950
Performance analysis of statistical multiplexing of heterogeneous discrete-time Markovian arrival processes in an ATM network
K. Kang, C. Kim 970
Simulative study on the performance improvement of conflict resolution schemes in Manhattan Street Network
C.-W. Bae, Y.-W. Kim, J.-B. Suk 979
An efficient adaptive routing algorithm for a network management system
T. Srikanthan, G.S. Hura 988
Queuing analysis of a non-pre-emptive MMPP/D/1 priority system
B. Venkataramani, S.K. Bose, K.R. Srivathsan 999
ID-based group-oriented cryptosystem and its digital signature scheme
T.-C. Wu, R.-L. Su 1019

Number 12

A quasi-static retrieval scheme for interactive VOD servers
S. Sengodan, V.O.K. Li 1031
A MAC protocol for HFC networks: Design issues and performance evaluation
N. Golmie, S. Masson, G. Pieris, D.H. Su 1042
Multiple connections in data communication and advanced applications
N. Boudriga, M.S. Obaidat, S.G.-E. Fatmi 1051
Performance study of buffer management schemes under multicasting traffic in ATM switching nodes
K.H. Sheta, M. Singhal 1059
A modular methodology to verify communication protocols
W. Peng, K. Makki 1069
An ATM service architecture for the transport of adaptively encoded live video
B.J. Vickers, T. Suda 1078
Interconnection network front-end controller combining to reduce hot spots effects
H. Sharif, H. Vakilzadian 1089
A real-time multicast routing algorithm for multimedia applications
X. Jia, N. Pissinou, K. Makki 1098
Design, analysis, and evaluation of an improved scheme for ATM burst-level admission control
W.M. Moh, U. Rajgopal, A. Dinesh 1107
A novel SVC mechanism for call connection and control in ATM networks
R.R. Henry, P.J. Darby III 1123

Number 13

An efficient approach for token-ring LAN emulation over ATM
R. Cohen, E. Stein 1133
Performance of ATM switch fabric using cross-point buffers
B. Zhou, M. Atiquzzaman 1146
Differential priority-based adaptive rate service discipline for QoS guarantee of video stream
S. Selvakumar, S.V. Raghavan 1160
Combined channel allocation and routing algorithms in packet switched networks
C.G. Kang, H.H. Tan 1175

Communication among real-time objects using the HU-DF inter-process-group communication scheme
K.H. Kim, C. Subbaraman 1191
Performance of a Delta ATM switch
K.M. Lye, K.G. Seah 1203
A multiclass priority-based slotted-ring network for LAN–ATM interworking
H. Çam 1216
Minimizing cell delay variation in CRMA/ATM interworking
A.K. Gupta, X. Wang, A. Das 1225

Number 14

Adaptive congestion control in ATM based networks: quality of service and high utilisation
A. Pitsillides, J. Lambert 1239
Kautz graphs as attractive logical topologies in multihop lightwave networks
C.P. Ravikumar, T. Rai, V. Verma 1259
Performance evaluation of triggered threshold buffer schemes for ATM networks
T.-Y. Huang 1271
Output process characterization for fast token ring networks supporting two priorities
M. Li, Z. Tsai 1280
An exact analysis of an asymmetric polling system with mixed service discipline and general service order
L.-C. Hwang, C.-J. Chang 1292
Three ID-based information security functions
W.-B. Lee, C.-C. Chang 1301

Number 15

Artificial intelligence approaches to network management: recent advances and a survey
G. P. Kumar, P. Venkataram 1313
Fairness and efficiency of slot reuse algorithms in DQDB MANS
M.A. Marsan, F. Saluta 1323
Performance and bandwidth balancing of the register insertion bus (RIB) fiber optic network
J.M. Ott, A.P. Jayasumana 1342
Design and implementation of an MMS environment on ISODE
R.S.-S. Chea, B.-S. Lee, R.L. Lim 1354
PVC management system for the Singapore national high-speed ATM testbed
R.R. Pillai, J. Biswas 1365
A proposal of a cryptography algorithm with techniques of error correction
W.G. Júnior, D.P. Júnior 1374
Dynamic key management schemes for access control in a hierarchy
C-H. Lin 1381

Number 16

Internet — services, facilities, protocols and architecture
R. Hunt 1397
The Internet: global information superhighway for the future
G.S. Hura 1412
Network system and world wide web security
B.C. Soh, S. Young 1431
Coping with file formats on the Internet
I. Costea, U. Guenther, R. Nicolescu 1437
A taxonomy of multicast protocols for Internet applications
W. Mostafa, M. Singhal 1448
An investigation into supporting collaboration over the Internet
D. Shah, L. Candy, E. Edmonds 1458
JAVA: network-centric enterprise computing
S. Ashok, V.K. Bansal 1467
Java hypermedia: on and beyond the world wide web
A. Verhoeven, K. Warendorf 1481
IP multicast routing through ATM networks
M. Smirnov, A. Wolisz 1490
Using proxies to enhance TCP performance over hybrid fiber coaxial networks
R. Cohen, S. Ramanathan 1502
Regulating the Internet: clutching at a straw?
A. Endeshaw 1519
India Network — the first case study of a virtual community
K.V. Rao 1527
An Internet application for on-line banking
S.K. Leong, T. Srikanthan, G.S. Hura 1534

Fault-tolerance, Network design, Packet switched networks, Capacity assignment, Routing 544
Performance, Allocation 863

OSI networks
SMDS, Frame relay networks 832
OSI Remote Procedure Call
ROSE interfaces, Control blocks 462
OSI system
Modularity, Efficiency, Protocol implementation strategies, Enhanced Subsystem Architecture 628
OSI systems management
Operation systems, Routing verification tests, Schedulers, Signalling system no. 7, Telecommunications management network 428
OSI
Bridge, Source routing algorithm, Transparent bridge algorithm, Learning bridge 899
Output process characterization
Fast token ring, Markov modulated process 1280

Packet delay
Random access protocol, Fairness, Poisson arrival stream, Queueing network, Generating function, Stochastic simulation 535
Packet switched networks
Channel allocation, Network design, Network optimization, Routing algorithm 1175
Fault-tolerance, Network design, Optimization, Capacity assignment, Routing 544
Partially ordered set
Multilevel data security, Access control, Key assignment, Key management, Cryptographic key, User hierarchy 1381
Passive Optical Networks (PONs)
Medium Access Control (MAC), ATM traffic 937
Path selection
Algorithm, ATM, Connection, Bandwidth, Caching, Simulation 605
PC routers
IP routers, Performance evaluation, Queueing model, Reflection technique 1
Performance analysis
ATM switch, Simulation 759
ATM, Cascade of buffered elements, Congestion control, Departure process, Heterogeneous ON–OFF sources, Virtual circuit 246
Discrete-time Markovian arrival process, ATM/B-ISDN 970
Performance evaluation
Congestion control, High-speed networks, Broadband ISDN, Asynchronous transfer mode (ATM), ATM LANs 261
MAN, DQDB 804
PC routers, IP routers, Queueing model, Reflection technique 1
Real-time communication, Multi-access protocol, TDMA, Deadline miss probability, Dimensioning 435
Performance measurements
Photonic packet switching node, All-optical ring networks, Optical address processing 662
Performance
Allocation, Optimization 863
ATM, Multistage switches, Buffer schemes, Markov chains 1146
Intelligent networks, Multimedia (applications) 219
MPEG, ATM, Multimedia interactive services 106
Multihop networks, Bilayered ShuffleNet 125
Signalling load, Multimedia signalling, Protocols 884

Periodic input queues
Connection Admission Control, Traffic descriptors, Shaping, Deterministic traffic pattern 11
Perl
Banking, Internet, Java, On-line services 1534
Personal communications
Distributed computing technologies, Electronic location technologies, IN, UPT, TMN 145
Personal Message Centre (PMC)
Multimedia, Messaging, Communication, Terminals, Networks 324
Phone
PSTN, Internet, E-mail, Multimedia, Fax, MIME 615
Photonic packet switching node
All-optical ring networks, Optical address processing, Performance measurements 662
Poisson arrival stream
Random access protocol, Fairness, Packet delay, Queueing network, Generating function, Stochastic simulation 535
Polling system
General service order, Genetic algorithm, Mean age, Mean excess, Mean waiting time, Mixed service discipline 1292
Polling systems
Mean waiting time, Non-preemptive exhaustive service discipline, Time limited, Vacation models 38
Priority weight
Head-of-the-line, Fetching probability, Replacement probability 288
Priority-based nonpreemptive access
Slotted ring network, Spatial reuse, Interworking, ATM switch, Delay and loss priorities, Throughput 1216
Privilege attribute certificate
Authorization, Privilege, Delegation, Access control decision function 376
Privilege
Authorization, Delegation, Privilege attribute certificate, Access control decision function 376
Program analysis
Distributed systems, Event-based debugging, Execution replay 385
Project
Operating systems, GeneSys, Application programmer interfaces 189
Protocol converters
Complementation 528
Protocol design
Robust software, SPIN 97
Protocol implementation strategies
Modularity, Efficiency, OSI system, Enhanced Subsystem Architecture 628
Protocol validation
Reachability analysis 772
Protocols
Signalling load, Multimedia signalling, Performance 884
Proxy agent
SNMP, SNMPv2, CMIP, MIB, Remote monitoring MIB, Multivendor management, Managed objects, Management interface, Proxy agent, TCP/IP 73
Proxy
Network management, SNMP, CMIP, ATM 349
PS
MPEG2, ATM, TS, AALS 825
PSTN
Internet, E-mail, Multimedia, Fax, Phone, MIME 615

PVC management
ATM testbed, Inter-operability 1365

QoS guarantee
Scheduler, Video traffic, Slotted channels, Dynamic weighted fair queuing 1160
QoS
Application, Management, B-ISDN, Scalability 393
ATM, SVC, VPC, BISDN 1123
Quality of Service (QOS)
Call Admission Control (CAC), Neutral network, Cell delay, Cell loss ratio, Heterogeneous-arrival queueing model 732
Quality of service (QoS)
Multimedia communication, Video-on-demand 475
Quality of service constraints
Session layer, Nested session, Session model, Advanced applications, Intersession dependency constraints 1051
Queueing model
PC routers, IP routers, Performance evaluation, Reflection technique 1
Queueing network
Random access protocol, Fairness, Poisson arrival stream, Packet delay, Generating function, Stochastic simulation 535

Random access protocol
Fairness, Poisson arrival stream, Packet delay, Queueing network, Generating function, Stochastic simulation 535
Rate control
ATM, LAN 273
Reachability analysis
Protocol validation 772
Real-time communication
Multi-access protocol, TDMA, Performance evaluation, Deadline miss probability, Dimensioning 435
Real-time communications
IN, Network delay attack, Clock synchronisation 211
Multicast routing, Minimal Steiner tree, Real-time multicast routing 1098
Real-time multicast routing
Multicast routing, Minimal Steiner tree, Real-time communications 1098
Real-time object
Autonomy, Distributed computing, RTO.k, Data field, HU-DF, Inter-RTO method communication, DREAM kernel 1191
Reconfiguration
Switching networks, Switching elements, Fault tolerance, Reliability 512
Reflection technique
PC routers, IP routers, Performance evaluation, Queueing model 1
Register insertion
Voice–data integration, Simulation 789
Reliability
Cryptography, Error-corrector codes, Secrecy, Communication network, Banking automatism 1374
Switching networks, Switching elements, Fault tolerance, Reconfiguration 512
Remote monitoring MIB
SNMP, SNMPv2, MIB, CMIP, Multivendor management, Managed objects, Management interface, Proxy agent, TCP/IP 73
Remote procedure call
Group communication, Causally ordering 724

Replacement probability
Priority weight, Head-of-the-line, Fetching probability 288
Residential broadband data services
Web proxies, TCP performance, Hybrid fiber coaxial networks 1502
RFC 2070
MAITS, HTML, WWW server 927
Robust software
Protocol design, SPIN 97
ROSE interfaces
OSI Remote Procedure Call, Control blocks 462
Routing algorithm
Channel allocation, Network design, Network optimization, Packet switched networks 1175
Routing verification tests
OSI systems management, Operation systems, Schedulers, Signalling system no. 7, Telecommunications management network 428
Routing
Fault-tolerance, Network design, Packet switched networks, Optimization, Capacity assignment 544
Multicast, Distributed algorithm 60
RTO.k
Autonomy, Distributed computing, Real-time object, Data field, HU-DF, Inter-RTO method communication, DREAM kernel 1191

Scalability
QoS, Application, Management, B-ISDN 393
Scheduler
QoS guarantee, Video traffic, Slotted channels, Dynamic weighted fair queuing 1160
Schedulers
OSI systems management, Operation systems, Routing verification tests, Signalling system no. 7, Telecommunications management network 428
Scheduling
Video-on-demand, Multimedia, Server 1031
Search engine
Archie, Bastion host, Browsers, Firewall, FTP, Gopher, Internet security, ISP, TCP/IP, Telnet, WAIS, WWW, HTML 1397
Secrecy
Cryptography, Error-corrector codes, Reliability, Communication network, Banking automatism 1374
Semi-Markov sequences (SMCs)
Markov-modulated Poisson process (MMPP), ATM networks 999
Server
Video-on-demand, Multimedia, Scheduling 1031
Service architecture
Intelligent networks, Service components, Session concept TINA 233
Service components
Intelligent networks, Service architecture, Session concept TINA 233
Session concept TINA
Intelligent networks, Service architecture, Service components 233
Session layer
Nested session, Session model, Advanced applications, Intersession dependency constraints, Quality of service constraints 1051
Session model
Session layer, Nested session, Advanced applications, Intersession dependency constraints, Quality of service constraints 1051
Shaper
GCRA, Enforcer, ATM 681
Shaping
Connection Admission Control, Traffic descriptors, Deterministic traffic pattern, Periodic input queues 11
Shop floor communications
Manufacturing message specification (MMS), Open systems interconnection (OSI) 1354
Signalling load
Multimedia signalling, Protocols, Performance 884
Signalling system no. 7
OSI systems management, Operation systems, Routing verification tests, Schedulers, Telecommunications management network 428
Simulation
Algorithm, ATM, Connection, Bandwidth, Path selection, Caching 605
ATM switch, Performance analysis 759
Metropolitan area networks, Fairness, Slot reuse 1323
Register insertion, Voice–data integration 789
Single point of failure
Clustered shared memory multiprocessing, Fault-tolerant interconnection network 197
Slot reuse
Metropolitan area networks, Fairness, Simulation 1323
Slotted channels
Scheduler, QoS guarantee, Video traffic, Dynamic weighted fair queuing 1160
Slotted ring network
Spatial reuse, Interworking, ATM switch, Priority-based nonpreemptive access, Delay and loss priorities, Throughput 1216
SMDS
OSI networks, Frame relay networks 832
SNMP
Network management, CMIP, Proxy, ATM 349
SNMPv2, CMIP, MIB, Remote monitoring MIB, Multivendor management, Managed objects, Management interface, Proxy agent, TCP/IP 73
SNMPv2
SNMP, CMIP, MIB, Remote monitoring MIB, Multivendor management, Managed objects, Management interface, Proxy agent, TCP/IP 73
Soft decision decoding algorithms
Block codes, Decoding stop rules, Information set decoding algorithm 302
Source routing algorithm
Bridge, Transparent bridge algorithm, OSI, Learning bridge 899
Source-Routing
Token-ring, ATM, LAN-Emulation, Learning-Bridges 1133
Spatial reuse
ATM ring, Fairness, Access algorithm 848
Slotted ring network, Interworking, ATM switch, Priority-based nonpreemptive access, Delay and loss priorities, Throughput 1216
SPIN
Protocol design, robust software 97
Spread spectrum
Wireless LANS, Forward error corrections, Multiple access networks 554
Stochastic simulation
Random access protocol, Fairness, Poisson arrival stream, Packet delay, Queueing network, Generating function 535
Subgradient heuristic
Computer network, Multidensity gateways, Internetwork, Hierarchical structure, Clustering 576
Subgradient Optimization Technique
Hierarchical network, Cluster, Index of Service, Lagrangean relaxation 507
SVC
ATM, VPC, BISDN, QOS 1123
Switch architecture
ATM, BISDN 639
Switching elements
Switching networks, Fault tolerance, Reconfiguration, Reliability 512
Switching networks
Switching elements, Fault tolerance, Reconfiguration, Reliability 512
Synchronization
Multimedia, Multicast communication, Extended finite state machine (EFSM) 950

Taxonomy
Internet applications, Multicast protocols 1448
TCP/IP
Archie, Bastion host, Browsers, Firewall, FTP, Gopher, Internet security, ISP, Search engine, Telnet, WAIS, WWW, HTML 1397
SNMP, SNMPv2, CMIP, MIB, Remote monitoring MIB, Multivendor management, Managed objects, Management interface, Proxy agent 73
TCP performance
Web proxies, Hybrid fiber coaxial networks, Residential broadband data services 1502
TDMA
Real-time communication, Multi-access protocol, Performance evaluation, Deadline miss probability, Dimensioning 435
Telecommunications management network
OSI systems management, Operation systems, Routing verification tests, Schedulers, Signalling system no. 7 428
Telnet
Archie, Bastion host, Browsers, Firewall, FTP, Gopher, Internet security, ISP, Search engine, TCP/IP, WAIS, WWW, HTML 1397
Temporal data model
Networks, Time dimension 694
Terminals
Personal Message Centre (PMC), Multimedia, Messaging, Communication, Networks 324
The Internet
Internet services, Global superhighway 1412
Throughput
Bypass queueing, Look-through/Look-back policies 115
Slotted ring network, Spatial reuse, Interworking, ATM switch, Priority-based nonpreemptive access, Delay and loss priorities 1216
Time dimension
Networks, Temporal data model 694
Time limited
Polling systems, Mean waiting time, Non-preemptive exhaustive service discipline, Vacation models 38

TMN
Personal communications, Distributed computing technologies, Electronic location technologies, IN, UPT 145
Token-ring
Source-Routing, ATM, LAN-Emulation, Learning-Bridges 1133
Topological expansion
Computer networks, Network management, Link enhancement, Genetic algorithm, Heuristics 798
Traffic descriptors
Connection Admission Control, Shaping, Deterministic traffic pattern, Periodic input queues 11
Transient fault
CSMA/DCR, Robustness, Real-time protocols, Local area network, LAN Permanent fault, Link failure 169
Transparent bridge algorithm
Bridge, Source routing algorithm, OSI, Learning bridge 899
TS
MPEG2, ATM, PS, AALS 825

'Undesirable' material
Copyright, Internet regulation 1519
UPT
Personal communications, Distributed computing technologies, Electronic location technologies, IN, TMN 145
User hierarchy
Multilevel data security, Partially ordered set, Access control, Key assignment, Key management, Cryptographic key 1381

Vacation models
Polling systems, Mean waiting time, Non-preemptive exhaustive service discipline, Time limited 38
Video conferencing
Multiparty, Multicast, IP networks 157
Video-on-demand
Multimedia communication, Quality of Service (QoS) 475
Multimedia, Server, Scheduling 1031
Video traffic
Scheduler, QoS guarantee, Slotted channels, Dynamic weighted fair queuing 1160
Virtual cell
Mobile IP, Mobile computer communications 586
Virtual circuit
ATM, Cascade of buffered elements, Congestion control, Departure process, Heterogeneous ON–OFF sources, Performance analysis 246
Virtual community
Asian Indians, Internet communication 1527
Voice–data integration
Register insertion, Simulation 789

VPC
ATM, SVC, BISDN, QOS 1123

WAIS
Archie, Bastion host, Browsers, Firewall, FTP, Gopher, Internet security, ISP, Search engine, TCP/IP, Telnet, WWW, HTML 1397
Wave division multiplexing
Deflection routing, Manhattan Street Network 979
WDM networks
Logical topologies, Multihop networks, Kautz graphs 1259
Web proxies
TCP performance, Hybrid fiber coaxial networks, Residential broadband data services 1502
Wireless LANS
Forward error corrections, Spread spectrum, Multiple access networks 554
Workstation networks
Heterogeneous distributed systems, Dynamic scheduling, Migrations, Concurrent processing 338
WWW
Advanced hypermedia, Java application development 1481
Archie, Bastion host, Browsers, Firewall, FTP, Gopher, Internet security, ISP, Search engine, TCP/IP, Telnet, WAIS, HTML 1397
WWW server
MAITS, RFC 2070, HTML 927
